SOFTWARE QUALITY ASSURANCE — MASTER DEFECT LOG & JIRA ISSUE REPORTS

Resilio Website QA Audit — Master Defect Log & 7 Active Jira Tickets

Project: Resilio-Website-QA-Audit | Active Jira Tickets: RQA3-1, RQA3-2, RQA3-3, RQA3-4, RQA3-6, RQA3-7, RQA3-8 | Reporter: K Manjunath

Audit Cycle: 09/Nov/26 – 11/Nov/26 | Due Date: 24/Nov/26 | Total Logged Defects: 7 (3 Sev-2 High, 3 Sev-3 Medium, 1 Sev-4 Low)

1. Master QA Defect Log Summary (DF-001 to DF-007)

This Master Defect Log consolidates all 7 active defects recorded in Sheet '17. Defect Log' of Resilio_Master_Test_Scenarios_and_Test_Cases.xlsx: 1 scripted boundary failure (DF-001 / TC-005) and 6 exploratory defects (DF-002 to DF-007 / EXP_TC_001 to EXP_TC_006), linked directly to their live Jira tickets.

Defect & Jira	TC & Module	Defect Summary & Root Cause	Severity / Prio	Status & Labels
DF-001 **RQA3-1**	TC-005 MOD-04: Careers	[UI] Careers form locks on "Submitting" after HTTP 413 response.	**Sev-2 (High)** **Prio: High**	In Progress UI-Bug
DF-002 **RQA3-2**	EXP_TC_001 MOD-04: Careers	[UI/API] Careers form rejects valid 4.3 MB PDF (<5 MB) with HTTP 413 and locks on "Submitting".	**Sev-2 (High)** **Prio: High**	In Progress API-Bug, UI-Bug
DF-003 **RQA3-3**	EXP_TC_002 MOD-01: Global UI	[UI] Global navbar "Login" and "Get in Touch" buttons overflow header container at compressed widths.	**Sev-3 (Medium)** **Prio: High**	In Progress UI-Bug
DF-004 **RQA3-4**	EXP_TC_003 MOD-02: Portfolio	[UI] Portfolio project headings overflow left column and overlap description text.	**Sev-3 (Medium)** **Prio: Medium**	In Progress UI-Bug
DF-005 **RQA3-6**	EXP_TC_004 MOD-06: Auth UI	[UI] "Back to Agency" navigation link overlaps "Welcome back" heading on Login and Sign Up pages.	**Sev-3 (Medium)** **Prio: High**	In Progress UI-Bug
DF-006 **RQA3-7**	EXP_TC_005 MOD-01/02: Cards	[UX/UI] Non-interactive informational cards display clickable pointer cursor (cursor: pointer) on hover.	**Sev-4 (Low)** **Prio: Low**	In Progress UI-Bug, UX_Bug
DF-007 **RQA3-8**	EXP_TC_006 MOD-01: Footer	[Functional] Footer GitHub link is broken and "Privacy Policy" & "Terms of Service" links misroute to /work-with-us.	**Sev-2 (High)** **Prio: High**	In Progress Functional-Bug

2. [RQA3-1] [UI] Careers application form remains stuck in "Submitting" state after HTTP 413 response.

Created: 09/Nov/26 | Start: 09/Nov/26 | Updated: 11/Nov/26 | Due: 24/Nov/26 | Jira Link: **RQA3-1**

Jira Field	Recorded Value	Jira Field	Recorded Value
Project & Issue Key	Resilio-QA / RQA3-1 (DF-001)	**Status & Resolution**	In Progress (Unresolved)
Priority	**High**	**Severity Level**	**Sev-2 (High)**
Reporter & Assignee	K Manjunath	**Test Case & Labels**	TC-005 | UI-Bug
Module & Build	MOD-04: Careers & WFH Application (BLD-1.1)	**Rank & Votes**	Rank: 0|i0000g: | Votes: 0
Evidence Attachments	TC-005-Careers-PDF-5.1MB.png, TC-005-Careers-PDF-5.1MB-NetworkTab.png	**Target Page URL**	resilio-partners.com/careers/.../apply

Description, Impact & Reproduction Details

Description: When a user attempts to upload a file larger than 5 MB (tested with a 5.1 MB PDF) on the Careers application form, the backend server rightly rejects the file with an HTTP 413 (Payload Too Large) error. However, the front-end UI fails to handle this response, causing the submit button to enter an infinite "Submitting..." state.

User & Business Impact: This completely blocks the user from submitting the application and provides no visual feedback regarding the file size limit. It forces a manual page refresh, which clears all entered form data, and creates significant user friction as they will likely retry the same file assuming a general system error.

Environment: Production (https://resilio-partners.com/careers/cmsdti4zw000011h7erglpm2f/apply) | OS: Windows 10 Pro | Browser: Google Chrome v156.0.8078.81 | Device: Desktop/Laptop

Reproducibility: 3/3 attempts (100% reproducible) | Test File Size: 5.1 MB | Format: PDF

Pre-conditions: (1) User is authenticated and on the specific job application page: https://resilio-partners.com/careers/cmsdti4zw000011h7erglpm2f/apply (2) User has a valid PDF file that is strictly larger than 5 MB (e.g., 5.1 MB).

Steps to Reproduce:

1. Navigate to https://resilio-partners.com/careers/cmsdti4zw000011h7erglpm2f/apply
2. Fill the application form with valid data.
3. Click the "Upload the file" button and select the 5.1 MB PDF file.
4. Click the "Submit" button and observe the UI state and Network tab.

Expected Result (Target Behavior)	Actual Result (Observed Defect Behavior)
The system should catch the server rejection, stop the loading spinner, and display a clear inline error message to the user (e.g., "File too large. Max 5MB.").	The "Submit" button hangs infinitely on "Submitting...", and no error message is displayed on the UI, despite the Network tab showing a failed POST request with a 413 status code.

Captured HTTP 413 Network Telemetry: POST https://resilio-partners.com/api/careers/upload-resume -> Status: 413 Content Too Large | X-Vercel-Error: FUNCTION_PAYLOAD_TOO_LARGE | Date: Mon, 09 Nov 2026 17:29:11 GMT | X-Vercel-Id: bom1::pkx7x-1794245349916-313e618b08a5

Severity — Sev-2 (High) Justification: It completely blocks the user journey and provides no feedback, forcing a hard refresh that deletes all user-inputted data.

3. [RQA3-2] [UI/API] Careers application form rejects valid 4.3 MB PDF (below 5 MB limit) with HTTP 413 and remains stuck in "Submitting" state.

Created: 11/Nov/26 | Start: 11/Nov/26 | Updated: 11/Nov/26 | Due: 24/Nov/26 | Jira Link: **RQA3-2**

Jira Field	Recorded Value	Jira Field	Recorded Value
Project & Issue Key	Resilio-QA / RQA3-2 (DF-002)	**Status & Resolution**	In Progress (Unresolved)
Priority	**High**	**Severity Level**	**Sev-2 (High)**
Reporter & Assignee	K Manjunath	**Test Case & Labels**	EXP_TC_001 | API-Bug, UI-Bug
Module & Build	MOD-04: Careers & WFH Application (BLD-1.1)	**Rank & Votes**	Rank: 0|i0000p: | Votes: 0
Evidence Attachments	TC-005-Careers-PDF-4.3MB-NetworkTab.mp4	**Target Page URL**	resilio-partners.com/careers/.../apply

Description, Impact & Reproduction Details

Description: Although the Careers application form specifies a 5 MB maximum file size limit, uploading a valid 4.3 MB PDF resume triggers an immediate backend rejection with HTTP 413 (Content Too Large). Furthermore, the front-end UI fails to handle this response, locking the submit button in an infinite "Submitting..." state with no error message.

User & Business Impact: Blocks applicants with valid resumes under the stated 5 MB limit (between ~4.3 MB and 5.0 MB) from applying, gives zero visual feedback, and forces a browser refresh that erases all typed form data.

Environment: Production (https://resilio-partners.com/careers/cmsdti4zw000011h7erglpm2f/apply) | OS: Windows 10 Pro | Browser: Google Chrome v156.0.8078.81 | Device: Desktop/Laptop

Reproducibility: 3/3 attempts (100% reproducible) | Test File: Dummy_Boundary_Resume_4.3MB.pdf (4.3 MB, PDF)

Pre-conditions: (1) User is on the /careers job application page. (2) User has a valid PDF resume strictly below 5 MB (Dummy_Boundary_Resume_4.3MB.pdf — 4.3 MB).

Steps to Reproduce:

1. Navigate to https://resilio-partners.com/careers/cmsdti4zw000011h7erglpm2f/apply.
2. Fill out all required application fields with valid data.
3. Click "Choose File" and select Dummy_Boundary_Resume_4.3MB.pdf (4.3 MB).
4. Click "Submit Application" and inspect the UI button and Chrome DevTools Network tab.

Expected Result (Target Behavior)	Actual Result (Observed Defect Behavior)
Because 4.3 MB is below the 5 MB limit, the server should accept the file and display 'Application Received' (or if constrained by Vercel's 4.5 MB limit, catch the error, stop the spinner, and state the true max file size).	The button hangs infinitely on "Submitting..." with no UI error. DevTools Network confirms POST /api/careers/upload-resume failed with HTTP 413 Content Too Large .

Captured HTTP 413 Network Telemetry: POST https://resilio-partners.com/api/careers/upload-resume -> Status: 413 Content Too Large.

Severity — Sev-2 (High) Justification: Rejects valid user files that comply with the stated 5 MB rule and completely locks the application journey without feedback.

4. [RQA3-3] [UI] Global navbar "Login" and "Get in Touch" buttons overflow header container at compressed screen widths.

Created: 11/Nov/26 | Start: 11/Nov/26 | Updated: 11/Nov/26 | Due: 24/Nov/26 | Jira Link: **RQA3-3**

Jira Field	Recorded Value	Jira Field	Recorded Value
Project & Issue Key	Resilio-QA / RQA3-3 (DF-003)	**Status & Resolution**	In Progress (Unresolved)
Priority	**High**	**Severity Level**	**Sev-3 (Medium)**
Reporter & Assignee	K Manjunath	**Test Case & Labels**	EXP_TC_002 | UI-Bug
Module & Build	MOD-01: Core Content & Global UI (BLD-1.0)	**Rank & Votes**	Rank: 0|i0000q: | Votes: 0
Evidence Attachments	Login_Button_UI_Defect.png, Get_In_Touch_Button_UI_Defect.png	**Target Page URL**	https://resilio-partners.com/

Description, Impact & Reproduction Details

Description: When the desktop browser window is compressed to intermediate tablet or split-screen widths (~768px–1024px), the fixed top navigation bar (<nav>) fails to collapse into a hamburger menu or adjust item spacing. Multi-word links wrap into 3 vertical lines and push the "Login" and "Get in Touch" buttons outside the right border of the navbar.

User & Business Impact: Visually breaks the global header across every page of the website on tablets and split-screen laptops, clipping the primary "Get in Touch" conversion button as "Get in to".

Environment: Production (https://resilio-partners.com/) | OS: Windows 10 Pro | Browser: Google Chrome v156.0.8078.81 | Device: Desktop/Laptop

Reproducibility: 3/3 attempts (100% reproducible) | Viewport Width: ~768px–1024px (Tablet / Split-Screen)

Pre-conditions: (1) User opens https://resilio-partners.com/ on a desktop or tablet browser. (2) Browser viewport width is set between 768px and 1024px (e.g., split-screen or DevTools docked).

Steps to Reproduce:

1. Navigate to https://resilio-partners.com/ (or /portfolio).
2. Resize the browser window width to ~768px–1024px.
3. Observe the right side of the rounded top navigation bar containing "Login" and "Get in Touch".

Expected Result (Target Behavior)	Actual Result (Observed Defect Behavior)
The navbar should switch to a compact hamburger menu at <= 1024px or scale padding so "Login" and "Get in Touch" stay fully inside the header container.	Navigation links ("Work From Home", "Work With Us") stack into 3 vertical lines and push "Login" and "Get in Touch" outside the navbar container, clipping "Get in Touch".

Severity — Sev-3 (Medium) Justification: Impacts the global navigation header on every page and partially cuts off the primary lead-generation CTA button.

5. [RQA3-4] [UI] Portfolio project headings overflow left column and overlap description text.

Created: 11/Nov/26 | Start: 11/Nov/26 | Updated: 11/Nov/26 | Due: 24/Nov/26 | Jira Link: **RQA3-4**

Jira Field	Recorded Value	Jira Field	Recorded Value
Project & Issue Key	Resilio-QA / RQA3-4 (DF-004)	**Status & Resolution**	In Progress (Unresolved)
Priority	**Medium**	**Severity Level**	**Sev-3 (Medium)**
Reporter & Assignee	K Manjunath	**Test Case & Labels**	EXP_TC_003 | UI-Bug
Module & Build	MOD-02: Services & Portfolio (BLD-1.0)	**Rank & Votes**	Rank: 0|i0000y: | Votes: 0
Evidence Attachments	Portfolio_Product_Header_Overflow_01.png, Portfolio_Product_Header_Overflow_02.png, Portfolio_Product_Header_Overflow_03.png, Portfolio_Product_Header_Overflow_04.png	**Target Page URL**	https://resilio-partners.com/portfolio

Description, Impact & Reproduction Details

Description: On the Portfolio page (/portfolio), project showcase cards use a 2-column layout (title on the left, description on the right). At intermediate screen widths (~768px–1024px), long words in project headings such as "MMORPG" in "Hoop Dynasty MMORPG" and "Management" in "Hotel Dwipa Management System" overflow the left column and collide directly into the right-hand paragraph text.

User & Business Impact: Makes both the project title and the adjacent case-study description unreadable, hurting brand credibility and violating WCAG 2.1 Level AA text reflow standards.

Environment: Production (https://resilio-partners.com/portfolio) | OS: Windows 10 Pro | Browser: Google Chrome v156.0.8078.81 | Device: Desktop/Laptop

Reproducibility: 3/3 attempts (100% reproducible) | Viewport Width: ~768px–1024px

Pre-conditions: (1) User is on the Portfolio page: https://resilio-partners.com/portfolio. (2) Browser viewport is set to an intermediate tablet/laptop width (~768px–1024px).

Steps to Reproduce:

1. Navigate to https://resilio-partners.com/portfolio.
2. Scroll to the "Hoop Dynasty MMORPG" and "Hotel Dwipa Management System" portfolio cards.
3. Inspect the alignment between the bold left-hand heading and the right-hand description paragraph.

Expected Result (Target Behavior)	Actual Result (Observed Defect Behavior)
Long heading words should wrap cleanly within the left column (or the card should stack into 1 column) with clear gutter spacing before the body text.	The words "MMORPG" and "Management" spill out of the left column and render directly on top of the right-hand description text.

Severity — Sev-3 (Medium) Justification: Direct text-on-text collision on a client-facing portfolio showcase page makes key content unreadable.

6. [RQA3-6] [UI] "Back to Agency" navigation link overlaps "Welcome back" heading on Login and Sign Up pages.

Created: 11/Nov/26 | Start: 11/Nov/26 | Updated: 11/Nov/26 | Due: 24/Nov/26 | Jira Link: **RQA3-6**

Jira Field	Recorded Value	Jira Field	Recorded Value
Project & Issue Key	Resilio-QA / RQA3-6 (DF-005)	**Status & Resolution**	In Progress (Unresolved)
Priority	**High**	**Severity Level**	**Sev-3 (Medium)**
Reporter & Assignee	K Manjunath	**Test Case & Labels**	EXP_TC_004 | UI-Bug
Module & Build	MOD-06: Authentication Gateway (BLD-1.2)	**Rank & Votes**	Rank: 0|i0001k: | Votes: 0
Evidence Attachments	SignUp_Page_UI_Defect.png, Login_Page_UI-Defect.png	**Target Page URL**	https://resilio-partners.com/login

Description, Impact & Reproduction Details

Description: On both the Login (/login) and Sign Up (/signup) pages, the top "Back to Agency" return link lacks vertical margin clearance and collides directly with the main "Welcome back" / Sign Up heading text.

User & Business Impact: Obstructs readability of the main heading and makes it harder for users to click "Back to Agency" to return to the public site.

Environment: Production (https://resilio-partners.com/login) | OS: Windows 10 Pro | Browser: Google Chrome v156.0.8078.81 | Device: Desktop/Laptop

Reproducibility: 3/3 attempts (100% reproducible) | Pages: /login and /signup

Pre-conditions: (1) User navigates to https://resilio-partners.com/login or /signup.

Steps to Reproduce:

1. Navigate to https://resilio-partners.com/login.
2. Inspect the top header area where "Back to Agency" and "Welcome back" are displayed.
3. Navigate to the Sign Up page and observe the same header area.

Expected Result (Target Behavior)	Actual Result (Observed Defect Behavior)
The "Back to Agency" link should sit cleanly above the "Welcome back" / Sign Up heading with adequate vertical spacing and zero overlap.	The "Back to Agency" link text directly overlaps the "Welcome back" heading on both Login and Sign Up screens.

Severity — Sev-3 (Medium) Justification: Affects the primary authentication gateway for clients and employees and obstructs the return navigation link.

7. [RQA3-7] [UX/UI] Non-interactive informational cards display clickable pointer cursor (cursor: pointer) on hover.

Created: 11/Nov/26 | Start: 11/Nov/26 | Updated: 11/Nov/26 | Due: 24/Nov/26 | Jira Link: **RQA3-7**

Jira Field	Recorded Value	Jira Field	Recorded Value
Project & Issue Key	Resilio-QA / RQA3-7 (DF-006)	**Status & Resolution**	In Progress (Unresolved)
Priority	Low	**Severity Level**	Sev-4 (Low)
Reporter & Assignee	K Manjunath	**Test Case & Labels**	EXP_TC_005 | UI-Bug, UX_Bug
Module & Build	MOD-01 / MOD-02: Global UI & Service Cards (BLD-1.0)	**Rank & Votes**	Rank: 0|i0001y: | Votes: 0
Evidence Attachments	Cursor_Defect.mp4	**Target Page URL**	https://resilio-partners.com/

Description, Impact & Reproduction Details

Description: Multiple static informational cards across the website apply the CSS rule cursor: pointer on hover, changing the mouse arrow into a clickable hand icon even though the cards have no link or click action.

User & Business Impact: Creates a false UX affordance—users repeatedly click the cards expecting to open a detail page and assume the website is unresponsive.

Environment: Production (https://resilio-partners.com/) | OS: Windows 10 Pro | Browser: Google Chrome v156.0.8078.81 | Device: Desktop/Laptop

Reproducibility: 3/3 attempts (100% reproducible) | Desktop Mouse Hover

Pre-conditions: (1) User opens https://resilio-partners.com/ on a desktop browser with a mouse/trackpad.

Steps to Reproduce:

1. Navigate to https://resilio-partners.com/ and scroll to the informational feature/service cards.
2. Hover the mouse cursor over the body of the static cards.
3. Click the cards and observe that no navigation or modal action occurs.

Expected Result (Target Behavior)	Actual Result (Observed Defect Behavior)
Unclickable informational cards should retain the default arrow cursor (cursor: default), reserving cursor: pointer strictly for interactive links and buttons.	The cursor turns into a clickable hand pointer (cursor: pointer) over non-interactive cards.

Severity — Sev-4 (Low) Justification: Minor usability/UX confusion with no functional blockage; resolvable via a 1-line CSS update.

8. [RQA3-8] [Functional] Footer GitHub link is broken and "Privacy Policy" & "Terms of Service" links misroute to /work-with-us.

Created: 11/Nov/26 | Start: 11/Nov/26 | Updated: 11/Nov/26 | Due: 24/Nov/26 | Jira Link: **RQA3-8**

Jira Field	Recorded Value	Jira Field	Recorded Value
Project & Issue Key	Resilio-QA / RQA3-8 (DF-007)	**Status & Resolution**	In Progress (Unresolved)
Priority	**High**	**Severity Level**	**Sev-2 (High)**
Reporter & Assignee	K Manjunath	**Test Case & Labels**	EXP_TC_006 | Functional-Bug
Module & Build	MOD-01: Global Footer Navigation & Legal Policies (BLD-1.0)	**Rank & Votes**	Rank: 0|i00024: | Votes: 0
Evidence Attachments	Broken_Links_Defect.mp4	**Target Page URL**	https://resilio-partners.com/

Description, Impact & Reproduction Details

Description: In the global website footer, clicking the GitHub social link leads to a broken "404 Page not found" destination on GitHub, and clicking the mandatory legal links ("Privacy Policy" and "Terms of Service") wrongly redirects the user to the /work-with-us Contact Form instead of displaying legal policy documents.

User & Business Impact: Directly violates BR-001 (website must present company policies) and FR-006 (navigation links must resolve to valid destinations), leaving the site without accessible Privacy Policy or Terms of Service pages while collecting user personal data and resumes.

Environment: Production (https://resilio-partners.com/) | OS: Windows 10 Pro | Browser: Google Chrome v156.0.8078.81 | Device: Desktop/Laptop

Reproducibility: 3/3 attempts (100% reproducible) | Global Website Footer

Pre-conditions: (1) User is on https://resilio-partners.com/ and scrolls to the bottom global footer.

Steps to Reproduce:

1. Scroll to the global footer of https://resilio-partners.com/.
2. Click the GitHub icon link and observe the broken "404 Page not found" destination.
3. Return to the footer, click "Privacy Policy" and "Terms of Service", and check the resulting URL and page content.

Expected Result (Target Behavior)	Actual Result (Observed Defect Behavior)
The GitHub icon should open a valid GitHub profile/repo, and "Privacy Policy" and "Terms of Service" should open dedicated legal policy pages.	The GitHub link lands on a GitHub "404 Page not found" page, and both "Privacy Policy" and "Terms of Service" redirect the user to https://resilio-partners.com/work-with-us.

Severity — Sev-2 (High) Justification: High-severity functional and compliance defect: users submitting personal contact details and resumes cannot access the company's Privacy Policy or Terms of Service.
