Description

Description: When the desktop browser window is compressed to intermediate tablet or split-screen widths (~768px–1024px), the fixed top navigation bar (<nav>) fails to collapse into a hamburger menu or adjust item spacing. Multi-word links wrap into 3 vertical lines and push the "Login" and "Get in Touch" buttons outside the right border of the navbar.

Impact: Visually breaks the global header across every page of the website on tablets and split-screen laptops, clipping the primary "Get in Touch" conversion button as "Get in to".

Environment:

- **Production:** Resilio Partners.
- **OS:** Windows 10 Pro.
- **Browser:** Google Chrome v156.0.8078.81.
- **Device:** Desktop/Laptop (HP ProBook 640 G2).

Reproducibility: 3/3 attempts (100% reproducible)

- **Viewport Width:** ~768px–1024px (Tablet / Split-Screen).

Pre-conditions:

1. User opens https://resilio-partners.com/ on a desktop or tablet browser.
2. Browser viewport width is set between 768px and 1024px (e.g., split-screen or DevTools docked).

Steps to Reproduce:

1. Navigate to https://resilio-partners.com/ (or /portfolio).

1. Resize the browser window width to ~768px–1024px.

1. Observe the right side of the rounded top navigation bar containing "Login" and "Get in Touch".

Expected Result: The navbar should switch to a compact hamburger menu at <= 1024px or scale padding so "Login" and "Get in Touch" stay fully inside the header container.

Actual Result: Navigation links ("Work From Home", "Work With Us") stack into 3 vertical lines and push "Login" and "Get in Touch" outside the navbar container, clipping "Get in Touch".

Severity — Sev-3 (Medium) Justification: Impacts the global navigation header on every page and partially cuts off the primary lead-generation CTA button.
